SAKO TRG-S

SAKO TRG-S is on a TRG sharpshooting system based bolt action hunting rifle with detachable clip magazine. The receiver is made by coldhammering method. The ACTION is designated: Long action M995 and it is made for calibers 30-378 Weatherby and 338 Lapua Magnum.

The MAGAZINE is detachable, reliable centre fed box magazine.

The single-stage TRIGGER pull is adjustable from 1 kg to 2 kg (2 to 4 lbs). All models are available with a single-set trigger as option.

The design of the STOCK and pistol grip makes the rifle suitable for both left and righthanded shooters. Due to the straight stock comes the recoil evenly backwards, therefore giving easy recoil control even under difficult hunting situation. The stock is made of polyurethane, reinforced with a rigid injection moulded skeleton.

The BUTTPLATE is the same as on the TRG SHOOTING SYSTEM. The stock length and heelplate angle can be easily adjusted with straight or angled spacers.

Open sights with post bead are adjustable for windage. Optionally available also without open sights. Integral rails for the scope mounts are on the top of the receiver.

The totally free-floating BARREL is cold-hammerforged.

TECHNICAL DATA

Action	caliber	rate of twist	Overall length	
M995	30-378 Wby Mag	11"	M995 Super Mag	1200 mm (47 1/4")
